LASER DISTANCE METER

TECHNICAL DATA

FEATURES

- Easily measure hard-to-access areas, like high ceilings, with laser targeting
- Instant measurement with one-button operation
- Quick calculation of area (square footage) and volume
- Easy addition and subtraction of measurements
- Pythagoras calculation for determining distance indirectly from two or three other measurements
- Maximum/Minimum measurements
- Reference point setting function
- Metric or Imperial units of measure
- Display backlight
- Storage of last 10 measurement results
- Includes battery

SPECIFICATIONS

Measuring Range: -0.05 to 45m

Accuracy: ≤10m: ±2.00mm; >10m: ±2mm ±0.05 x distance in metres -10)

Laser Type: Class II, <1mW, 620 to 690 nm

Power Supply: 2 x AAA 1.5V batteries

Dimensions: 112 x 48 x 25mm

Weight: 120g
