SITE-LOG LPC/LPCB

Product Specifications

OVERVIEW

The SITE-LOG LPC-1/LPCB-1 is a 7-channel, battery powered, stand alone current DC data logger with storage up to 4 MB of data in non-volatile flash memory. Input current signals can be from sensors, transducers, transmitters or any other common current sources.

Its on-board temperature channel provides environment monitoring and temperature compensation.

Its aluminum enclosure makes it excellent in the harshest industrial environment.

Plug & Play USB port and versatile custom equation simplify communications and engineering unit conversion. 16-bit ADC makes it well suited for science and laboratory applications where precise and accurate measurements are critical.

Simply plug the logger to computer's USB port, and the software automatically recognizes it and handles the configuration, downloading, graph viewing and more…

FEATURES

High Data Resolution:
The 16-bit analog-to-digital converter meets most high-resolution requirements.

Large Memory Size:
The 4-Mega-Byte Memory stores years of measurements.

Programmable Input Ranges:
One on-board thermistor channel monitors ambient temperature. Seven range-programmable voltage external input channels cover wide measurement requirements.

Multiple Communication Interfaces:
The SITE-LOG data loggers can be accessed via USB, MODEM, or Ethernet connections with auto baud rate of up to 115 kbps.
