*Single-use Cold Chain PDF
Temperature Data Logger*

The Maxilog-PDF logger is now available for use in cold chain applications to escort critical temperature shipments of pharmaceuticals, seafood, product, dairy, meat, and other refrigerated products. The logger is programmed to operate for 90 days of continuous temperature recording. This logger is completely preprogrammed with a standard start delay of 30 minutes to allow the logger to adjust to the internal temperatures of the cargo being shipped.

The unit is compact, lightweight and makes it ideal to fit inside small packages. No special software or drivers are required for set-up, or to download the temperature time-stamped data. When plugged into a USB port, the logger will automatically download the data to a Graph, Summary information and Tabular Results file.

The logger is a mass storage device with memory storage of 14,400 readings, and measurement interval of 10 minutes. Monitor all your shipments with plug-and-play technology.
