Product Features

Automatic Defrost Design

Automatic air-cooled defrosting technology minimizes frost accumulation, eliminating the need for frequent manual defrosting and ensuring continuous, hassle-free operation

Forced-Air Cooling

A forced air circulation system ensures rapid temperature recovery after door openings, minimizing fluctuations to protect sample integrity

High Energy Efficiency

Equipped with an inverter compressor and an optimized refrigeration system, it delivers exceptional energy savings and consistent performance

Microprocessor-Controlled System

Precision temperature controller with a microprocessor, featuring a -30°C to -10°C temperature range and 0.1°C display accuracy

Fast Temperature Recovery

Rapid temperature recovery after a 1-minute door opening, over 20% higher efficiency than direct cooling, ensuring optimal protection of samples

Eco-Friendly & Sustainable

Hydrocarbon refrigerant and non-toxic, eco-friendly insulation materials for a sustainable, low-carbon footprint

Multiple Alarm Functions

Including high/low temperature alarm, sensor error alarm, power failure alarm, low battery alarm, door ajar alarm, high ambient temperature alarm, condenser dirty alarm. Alarm mode is sound and flash

Superior Temperature Uniformity

At a set temperature of -30°C, the empty-chamber temperature uniformity is maintained at $\leq \pm 2^\circ\text{C}$, and during defrosting, it is maintained at $\leq \pm 5^\circ\text{C}$, ensuring a highly stable sample storage environment

Rich Configurations

Standard: Touchscreen, USB, RS485, wire shelves
Optional: Blood bag drawers, stainless steel inner liner, stainless steel drawers, temperature chart recorder

Ergonomic Design

6.67" LCD touchscreen clearly displays temperature curves and operational status, enabling comprehensive monitoring of sample storage conditions

Self-closing doors with recessed handles for smooth operation

Four swivel casters and two adjustable leveling feet for easy moving and installation

- Standard USB interface support for export temperature, operation and fault alarm data
- Optional temperature chart recorder ensures full temperature traceability

Standard with 5 adjustable wire shelves, accommodating up to 30 blood-bag drawers (optional)

Optional 7 stainless steel drawers for maximum storage flexibility
