Calib'Box S

Self-calibration and adjustment of Nano SPYs at 0°C

FT 13672 EN A

Non contractual photo

Presentation

The Calib'box S enables 8 Nano SPYs to be self-calibrated and adjusted simultaneously, without any need for metrological expertise. It is extremely easy to use. A detailed procedure is available by scanning a QR Code.

Metrological verification is carried out remotely by the JRI metrology laboratory. Certificates are directly online on MySirius.

Use of Calib'Box S requires a single self-calibration order, or a package of 10, 50 or 100 self-calibrations directly on MySirius.

Benefits

- Easy to use
Install your Nano SPYs in the box for 3 to 6 hours, then put them back when you receive a notification. You'll receive your certificates within 24h* (*except the day before a weekends and public holidays).
- Excellent homogeneity and stability, making it a high-performance calibration medium.
- Generation of genuine verification reports in compliance with current international metrological standards: A JRI metrologist supervises and validates operations and delivers verification reports with real metrological value, with real metrological value.
- Automatic adjustment in the event of excessive drift.
